

7.4.1.a. What do you do if it's too:

Example: If it's too *diluted* (first word in the list below), you *concentrate* it. (the following word or words)

KEY

CHANGES +
TRANSFORMATIONS

narrow: widen	straight: bend/curve
diluted: concentrate	crooked or bent: straighten
contaminated: decontaminate	bright: dim/darken
soiled: clean	long (report): shorten or condense
impure: purify	loose: tighten
long: shorten	tight: loosen
short: lengthen	poor in quality: improve
big: shrink/decrease its size	thick: thin
hard: soften	thin: thicken
supple:	slow: speed up
harden/strengthen/stiffen	fast: slow down
cold: warm/heat	bulky: squeeze, compact
wrong shape: reshape	dry: moisten, humidify
strong: weaken/dilute	humid: dry/dehumidify
concentrated: dissipate/dilute (liquids)	moist: dry
weak: strengthen	hot: cool/chill
light: darken/saturate	high: lower
dark (color): lighten/desaturate	low: raise
dark (room): brighten	brittle: reinforce, strengthen
heavy: lighten	small: enlarge/expand
	delicate: strengthen, reinforce

7.4.1.b. What happens to it? It(they):

1. evaporates
2. boils
3. freezes
4. dries
5. thins
6. rusts
7. shrink
8. fade
9. swells, expands
10. bursts
11. ignites
12. hardens, cools
13. become brittle
14. melt
15. expands, spreads
16. breaks, cracks
17. shatters, smashes
18. cracks
19. cracks, fissures
20. warps
21. foams
22. chips
23. split/fission
24. softens
25. condenses
26. bends
27. bends/curves
28. disperses/scatters
29. dissolves
30. burns
31. melts
32. becomes impregnated (soggy)
33. congeals
34. stretches
35. contracts
36. expands
37. corrodes
38. is neutralized
39. is etched
40. withers
